Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: the closest prior art of record, i.e., the references listed on PTO Form 1449, teach processes for preparing a carbonyl compound by oxidizing a water-insoluble alcohol with hydrogen peroxide; however, the prior art teaches a homogeneous solution system, while the instant claims are drawn to a process conducted in a heterogeneous solution system. It would not have been obvious for a person having ordinary skill in the art, nor would such a person have been motivated, to move from a homogeneous process taught by the prior art, to a process conducted in a heterogeneous solution system, as claimed herein.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows: the following sentence has been added to page 1 of the specification, directly below the heading, "Technical Field":

This application is the national stage of PCT/JP03/09377, filed July 24, 2003, and published as WO 04/014830 on February 19, 2004.
